

### **ELECTRICAL TOOLS**

Proto® tools have always had a wide following among industrial electricians. That's no surprise given the breadth of our line: the more than 300 individual items in our electrical lineup include everything needed to cut, crimp, bend, move, or secure wire and cable — and do to it easier, faster, and safer than ever.

Of course electricians face a challenge that other trades don't – the need to sometimes work on live circuits. Operations performed under voltage are becoming more common in industrial settings, while on-the-job safety is a growing concern for workers and employers alike. That's why the centerpiece of our electrical tool lineup is an extensive line of 1000-Volt Insulated Tools. These include a variety of screwdrivers, pliers, cutting tools, wrenches, drive tools, and keys. The handles on these tools are wrapped with a thick layer of plastic insulation that protects the user against shock when working on live circuits of up to 1000 V AC and 1500 V DC. All of these tools are individually tested and checked.

Our 1000V tools come in two classes. VE Series tools are designed for craftsmen who install and maintain electrical equipment in buildings, and combine the safety requirements needed for working on or near live components with ergonomics and practicality. VSE Series tools are aimed at users who work around higher live voltages, as is the case in electrical power plants. As an added safety feature we have fitted our VSE tools with two layers of insulation: an orange top layer and an underlying yellow layer. When the top layer becomes worn or damaged it exposes the underlying yellow layer, which tells the user that it's time to replace the tool. These tools also have larger guards to help keep hands clear of the non-insulated parts of the tool.

We design all of our electrical tools according to strict ergonomic standards with handles that encourage a secure grip while reducing hand fatigue. Cutting tools are made from chrome alloy steel, and have double heat treated edges for extra hardness.

Electrical tools can be purchased individually or in sets. Proto<sup>®</sup> also offers a master set that has been assembled with the basic tools needed by the electrical trades.

#### SAFETY TIPS

- To work under current, you must be trained and certified from an official organization.
- Use insulated electrician's gloves, mats, and eye protection.
- Check that the insulation is sound before using the tool.
- Never use a tool with cracked, cut or damaged insulation.
- Discard tools with damaged or worn insulation.
- · Never attempt to modify the tool's insulation.
- Do not let others use your insulated tools.
- Always use the correct tool for the job.
- · Check standards and approval markings.
- · Read safety recommendations and keep the instructions.

### SET NO. FC-2187C.VSE - FACOM® 41 PC. 1000V SE

### WARRANTY AND DISCLAIMER

#### LIMITED LIFETIME WARRANTY

The Stanley Works and Proto Industrial Tools (collectively referred to as "TSW/Proto") warrants any of its Proto manufactured products for the useful life of the product against deficiency in material or workmanship.

Torque Wrenches, Multipliers and Testers are warranted for one year, except for calibration which is warranted for 90 days from date of purchase. Torque products can be repaired and recalibrated for a nominal charge at the Stanley Proto Authorized repair center (2195 East View Parkway, Suite 103 Conyers, GA 30013). Defects in material or workmanship will be repaired or replaced at no cost, all other repairs will be at a nominal charge. Torque products are precise measuring devices that require care in handling. Stanley Proto recommends that all micrometer wrenches be recalibrated once a year or more, depending on usage.

#### **DISCLAIMERS AND LIMITATIONS**

- Is subject to the disclaimers and limitations described below and is in lieu of all other warranties, express or implied, including the implied warranty of merchantability or fitness for a particular purpose.
- Gives you specific legal rights. You may also have other rights that vary by state.
- Does not extend to products that have been improperly used, altered, or repaired by any entity other than TSW/Proto.
- Does not extend to any claim for incidental, consequential, or special damages. Some states do not allow the exclusion of limitation of incidental or consequential damages, so this exclusion may not apply to you.
- TSW/Proto makes no representations beyond those contained in this Limited Lifetime Warranty.
- Agents of TSW/Proto have no authority to make representations of any sort beyond those contained in this Limited Lifetime Warranty.

#### **EXCLUSIVE REMEDY AND CLAIM PROCEDURE**

- Distributors of record must act as a return agent.
- The exclusive remedy under this Limited Lifetime Warranty for products determined to be deficient in materials or workmanship by TSW/Proto is repair or replacement with a reconditioned tool of equal value by TSW/Proto.
- The selected remedy is at the sole discretion of TSW/Proto.
   In no event shall TSW/Proto be responsible for more than the original purchase price of the product.
